Optimizing Discount and Marketing Strategies to Maximize Sales Performance and Profitability

1)Problem Statement:

In today's competitive business environment, companies frequently use discounts and marketing campaigns to increase sales. However, excessive discounts and ineffective campaigns can negatively impact overall profitability. There is a need to analyze how these strategies influence sales performance and profit margins. This project aims to evaluate the effectiveness of discount and marketing strategies and identify optimal approaches to improve business performance.

2)what it is:

This project analyzes sales, profit, discount, and marketing campaign data using Business Intelligence tools. It evaluates the relationship between discounts, campaigns, and profitability to identify effective strategies for maximizing sales and profit.

3)Objectives:

- To analyze the impact of discounts on sales and profitability
- To evaluate the effectiveness of different marketing campaigns
- To identify high-performing products, regions, and customer segments
- To study customer behavior and purchase patterns
- To provide data-driven recommendations for improving sales and profits.

4)Business Insights:

- Identifies how discounts impact sales and profitability using Power BI dashboards
- Evaluates marketing campaign performance across regions and products
- Highlights key trends to support data-driven business decisions

5)Methodology/ implementation plan:

Phase	Phase Name	Description
1	Data Collection & Exploration	Collected the structured business transaction dataset (CSV/Excel) containing 1000 records for 2025.
2	Data Cleaning & Pre-processing	Removed duplicate records, handled missing values, corrected incorrect data formats, and standardized Duplicates, IF/IFERROR, Text-to-Columns, Sorting, and Filtering to prepare clean data for analysis.
3	Data Analysis & AI Integration	Applied Pivot Tables and Excel formulas (SUMIF, COUNTIF, VLOOKUP, AVERAGE) to calculate KPIs such as Total Sales, Net Profit, Profit Margin, Campaign Performance, and Customer Ratings. Integrated AI
4	Visualization & Report Generation	Developed interactive dashboards using charts, KPI cards, and slicers in Excel/Power BI. Generated structured AI-based executive reports summarizing key insights. Documented AI prompts used and corresponding outputs.
5	Documentation & Submission	Compiled the complete project report including problem statement, objectives, methodology, analysis, dashboards, and AI outputs. Uploaded project files (if required) and prepared presentation/demo for evaluation.

6. Resources and Timeline:

A. Hardware & Software Requirements:

- Laptop or PC – Intel Core i3 or higher, minimum 4 GB RAM (8 GB recommended)
- Operating System – Windows 10 / 11 or macOS
- Microsoft Excel (Microsoft 365 / Excel 2019 or later)
- Microsoft Copilot (via Microsoft 365 subscription)
- AI Tool – ChatGPT / Copilot Web (for AI prompt-based summarization)
- Internet connection (required for AI access)
- Web Browser – Google Chrome or Microsoft Edge (latest version)

B. Dataset:

- The dataset used in this project is a structured business dataset containing 1000 records.
- The dataset includes fields such as Date, Region, Product, Customer Type, Revenue, Cost, and Profit.
- The dataset was cleaned by removing duplicates, handling missing

values, and standardizing formats.

- KPIs such as Total Revenue, Total Profit, Profit Margin, and Growth Rate were calculated.
- The cleaned dataset was used as input for AI prompt-based business summarization.

Phase	Task	Tentative Completion Date
1	Dataset collection, exploration, and understanding	Week 1
2	Data cleaning, pre-processing, and validation / Prompt design	Week 2
3	Analysis, AI tool integration (Copilot / Chatbot), and insight generation	Week 2 – 3
4	Dashboard / output build, testing, and review	Week 3
5	Report writing, GitHub upload, and video recording and submission	Week 4

7)Expected Outcome:

- Identification of optimal discount strategies to maximize profitability
- Evaluation of effective marketing campaigns to improve sales performance
- Clear insights into sales and profit trends across products and regions using Power BI dashboards
- Data-driven recommendations for better business decision-making.
